- A non-classified rider will score the maximum number of points, in relation to the number of riders authorized to start in the heat.
- To be included in the classification of a race, competitors must have completed, a number of laps equal to at least 50% of the number of laps completed by the winner of the race in the category concerned.

The number of laps corresponding to this percentage will be rounded down to the nearest whole number.

- The event classification will be made with the addition of score points from every race.
- The rider who scored the lowest number of points will be classified first.
- Competitors who are not classified in both races will appear in the final ranking of the event as “unclassified” and will not receive any FIM points.

In case of a draw:

- A competitor who was not completing one of the two races cannot be ranked ahead of a competitor who finished and was classified in both races.
- The result of the last race will be decisive; the rider who scored the best result will be ranked before.
